

Guilherme Martins Barradas

Quality Engineer · AI QA · SDET

Rio de Janeiro, Brazil · +55 21 97058-9112 · guilhermebarradasdev@gmail.com · linkedin.com/in/guilherme-m-47781820b · github.com/GuiBarradas

PROFESSIONAL SUMMARY

AI Quality Engineer with 4 years across backend, blockchain, and evaluation of AI systems. Since 2024 I have been evaluating LLM-generated code on projects for Scale AI and Anthropic (via Alignerr): building containerized test environments, designing adversarial tasks to expose model failures, reviewing agent outputs for correctness and production-readiness, and contributing to quality benchmarks used in model-training pipelines. Before that, I led backend development for a crypto arbitrage protocol on Polygon (Node.js/AdonisJS, Solidity, Docker, CI/CD). I care about the same question in every role: how do we know this works? English C1. Open to remote roles with US and European teams.

TECHNICAL SKILLS

Quality & Testing:	Test automation · pytest · unittest · JUnit · Maven Surefire · vitest · googletest · Ginkgo/Gomega · Test harness design · Regression testing · Edge-case analysis · Code review · Selenium
AI Evaluation:	LLM evaluation · RLHF preference data · Agent trajectory analysis · Adversarial prompt design · Rubric design · Benchmark construction · Model failure analysis · RAG · Claude Code · Cursor
Languages:	Python · TypeScript · JavaScript · Node.js · Solidity · SQL · Bash · Go · Rust · Java · C/C++ · PHP
Backend & Web3:	AdonisJS · REST · GraphQL · PostgreSQL · MySQL · OAuth 2.0 · Ethereum · Polygon · ERC-20 · Web3.js · Ethers.js
DevOps & Cloud:	Docker · docker-compose · CI/CD · GitHub Actions · GitLab CI · Linux · AWS · Google Cloud · DigitalOcean · Nginx · Sentry · Grafana · Zabbix
Data & ML:	PyTorch · Hugging Face Transformers · NumPy · Pandas · openpyxl · Web scraping · Data curation · PII/compliance scanning

PROFESSIONAL EXPERIENCE

AI Quality Engineer · Scale AI

Nov 2024 – Present

Remote · Contract

- Built 95+ containerized test environments from real open-source repositories to evaluate AI coding agents, with automated harnesses that run test suites before and after code changes.
- Wrote parsers unifying pytest, JUnit, Maven and googletest output into one JSON schema; 480+ tests captured and classified.
- Designed adversarial coding tasks and security challenges (SSRF, IDOR, mass assignment) that frontier models must solve without leaked hints, validated against Claude Opus/Sonnet 5, GPT-5.6 and Gemini 3.7.
- Analyzed model failures to separate real bugs from broken test setups; promoted to reviewer of other contributors' work.
- Automated data curation with Python: 350+ licensed documents into long-context evaluation sets, with license checks and PII scanning.

Stack: Python, Docker, pytest, JUnit, vitest, Bash, Git. Also validated code in Java, TypeScript, Go, Rust and C++.

AI Quality Engineer (Anthropic project) · Alignerr

Jan 2026 – Jun 2026

Remote · Contract

- Evaluated coding-agent transcripts on real open-source engineering tasks (including scikit-learn, numpy and pandas), rating correctness, code quality, safety and honesty across 12 criteria and producing pairwise preference data for model training.
- Ran hands-on agent sessions on professional codebases, steering the agent over multiple turns to surface real defects such as false claims of success, skipped verification and hallucinated APIs.
- Classified agent failures with a defect taxonomy grounded in actual tool calls rather than the model's own narration.
- Built and validated a full LBO + DCF financial model programmatically in Python (openpyxl) with three independent verification scripts.

Stack: Python, Claude Code, Git, openpyxl.

Lead Backend Developer · Atom Smart Chains

Sep 2025 – Apr 2026

Lisbon, Portugal · Remote · Full-time

- Led backend development of a crypto arbitrage protocol on Polygon across four major versions, including automated on-chain scheduling modules for trading and lottery operations.
- Designed and documented REST and GraphQL APIs in Node.js/AdonisJS, connecting on-chain contracts to off-chain services with token-based authentication and a PostgreSQL backend.
- Owned the Solidity smart contracts (ERC-20): development, security review, token validation and mainnet deployment.
- Set up Docker-based environments and CI/CD pipelines on GitHub Actions and GitLab CI for automated build, test and deploy.

Stack: Node.js, TypeScript, AdonisJS, Solidity, PostgreSQL, GraphQL, Docker, Angular, Rust.

Jr. Fullstack Developer · Atom Smart Chains

Oct 2024 – Sep 2025

Lisbon, Portugal · Remote · Full-time

- Contributed to smart contract testing, API integration and full project delivery (contracts, web, documentation and whitepaper) in a Docker-based workflow.

Network Analyst · Defensoria Pública do Estado do RJ

Sep 2024 – Nov 2024

Rio de Janeiro, Brazil · Internship · On-site

- Monitored and deployed network links; configured firewalls and security policies using Zabbix, Dude and Grafana.

IT Support & Infrastructure · Defensoria Pública do Estado do RJ

Apr 2024 – Sep 2024

Rio de Janeiro, Brazil · Internship · On-site

- Technical user support, hardware maintenance and installation, and structured documentation and reporting.

Fullstack Developer Trainee · NTL Nova Tecnologia Ltda.

Mar 2022 – Jul 2023

Rio de Janeiro, Brazil · Apprenticeship · On-site

- Built ERP systems in PHP; maintained legacy systems and shipped performance and reliability improvements.

EDUCATION

Associate Degree in Systems Analysis and Development · UERJ (State University of Rio de Janeiro)

2021 – 2026

English as a Second Language · Cultura Inglesa

2018 – 2022

CERTIFICATIONS & AWARDS

- ISTQB CTFL and CT-AI (AI Testing): in progress
- EFSET English Certificate · C1 Advanced
- Introduction to Cybersecurity and Cybersecurity Essentials (Cisco) · Cybersecurity Training (Hackers do Bem)
- Brazilian Robotics Olympiad (OBR): Gold Medal, Municipal (2015, 2016); Honorable Mention, State (2016)
- International Robot Tournament (ITR 2016): Gold Medal (High Risk Rescue), Silver Medal (Flat Rescue)

LANGUAGES

English (C1 Advanced) · Portuguese (Native) · Spanish (A2)
